SRI Guidelines

Carmignac Portfolio Grande Europe

February 2022

Carmignac's Overarching Sustainable Framework

Firm

- Our operations are Carbon neutral 2019¹
- Office Environmental practices
- UNPRI signatory 2012

3 key engagement themes

- Climate Change
- Empowerment
- Leadership

Firm-wide exclusions

- Tobacco Free supporter
- Coal exclusions and total coal exit 2030
- Energy investments aligned to Paris Agreement

100% ESG integration

- All portfolio managers and analysts are responsible for ESG integration

100% voting

- Fulfil our fiduciary duty
- Represent our shareholders rights

19 RI fund labels

- Rigorous 3rd party audit
- French ISR²
- Belgian Towards Sustainability³

ESG Platform START⁴

- Multiple source ESG indicators
- Proprietary scoring and analysis
- Smart interface for all PM ESG requirements

90% Article 8 and 9 (SFDR⁵)

- 17% Article 9 funds
- Over 70% Article 8 funds

¹ Scope 1, 2 and Scope 3 (business travel and IT services). For more information please consult https://www.carmignac.lu/en_GB/responsible-investment/snapshot-4742

² French Label ISR. For further information, please visit <https://www.lelabelisr.fr/en/>

³ Belgian Label Towards Sustainability. For further information, please visit: <https://www.towardsustainability.be>

⁴ The proprietary ESG system START combines and aggregates market leading data providers ESG indicators. Given the lack of standardisation and reporting of some ESG indicators by public companies, not all relevant indicators can be taken into consideration. START provides a centralised system whereby Carmignac's proprietary analysis and insights related to each company are expressed, irrespective of the aggregated external data should it be incomplete

For further information, please visit <https://www.towardsustainability.be/> <https://www.febelfin.be/fr> 5) Socially Responsible Investment Source: Carmignac, November 2021

Internal ESG Guidelines

PORTFOLIO CONSTRUCTION OBJECTIVE

- ▶ This Fund has sustainability investment as its objective. Our sustainable objective is: >50% Fund's AUM invested in companies with >50% revenue derived from goods and services positively aligned with at least 1 of 9 targeted SDGs.
- ▶ Investment universe is reduced by more than 20% through extra-financial criteria and negative screenings (including MSCI¹ assessment and outcomes framework)
- ▶ The Fund aims to achieve carbon emissions 30% lower than its comparator benchmark (MSCI World)²

INTEGRATION OF ESG CRITERIA

- ▶ Minimum 90% of portfolio holdings are analysed for ESG risks and opportunities
- ▶ ESG research system START³ used to centralise raw ESG Data, proprietary scoring and revenue impact

VOTING & ENGAGEMENT

- ▶ An objective of participation rate of 100%
- ▶ We commit to a strengthened dialogue with companies to improve their approach to ESG issues aligned with our corporate themes⁴

¹ MSCI ESG Ratings is a proprietary methodology from MCSI. To arrive at a final rating (from AAA the best to CCC the worst) the weighted averages of the 37 Key Issue Scores covering 10 different themes (4 for Environment, 4 for Social & 2 for Governance) are aggregated and companies' scores are normalized relative to their industries. These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers. Carmignac is conscious that by monitoring 37 Key Issue Score the methodology cannot follow all the sustainable aspects from the development of companies but Carmignac ensures that this is the most appropriate one. Moreover, by defining a rating relative to industry peers, the rating cannot be taken as the objective/ inherent assessment of the Company approach in regards of sustainability.

² CO₂ emissions: The Sub-Fund aims to achieve carbon emissions 30% lower than the reference indicator as measured by carbon intensity (tCO₂/mUSD revenue converted to Euros; aggregated at portfolio level (Scope 1 and 2 of GHG Protocol))

³ The proprietary ESG system START combines and aggregates market leading data providers ESG indicators. Given the lack of standardisation and reporting of some ESG indicators by public companies, not all relevant indicators can be taken into consideration. START provides a centralised system whereby Carmignac's proprietary analysis and insights related to each company are expressed, irrespective of the aggregated external data should it be incomplete

SRI Filter: Relative (Risk) and Absolute (Outcomes) Screening

Outcomes Framework**

25 Investable Themes linked to 9 UN SDGs

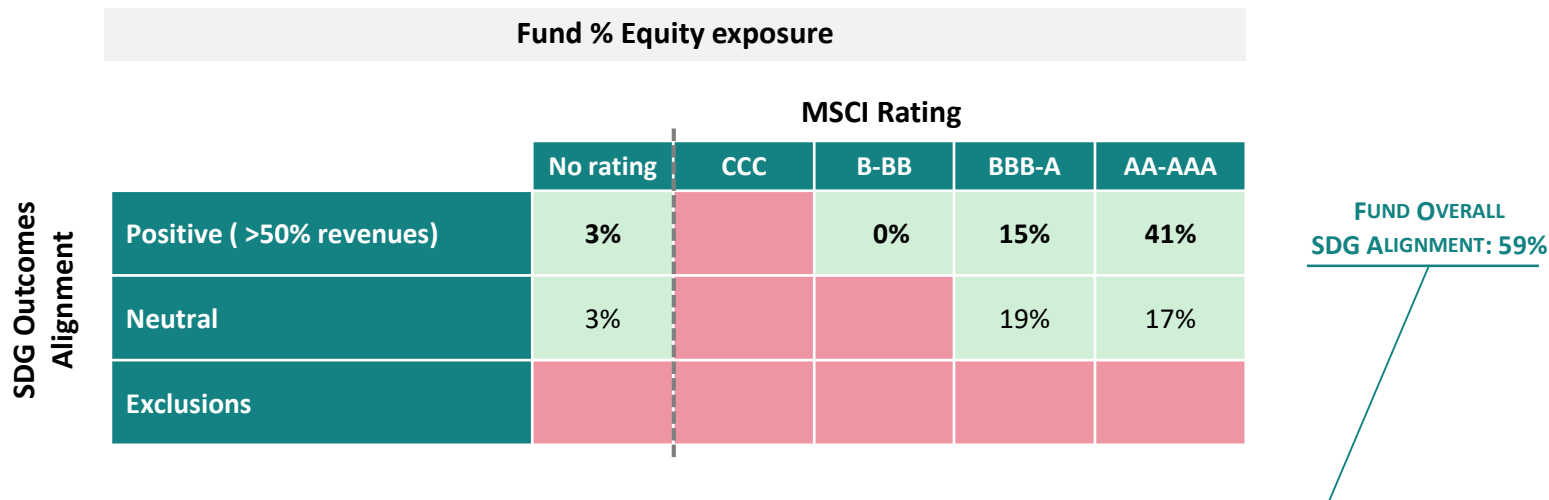

Low cost products and services	1 No poverty
Enabling economic infrastructure	
Access to financial services	
Sales of healthy and affordable food	2 Zero hunger
Food production and sourcing	
Food system productivity	3 Good health and well-being
Personal care and wellbeing	
Healthcare facilities and services	
Medical products, biotech and pharma	4 Quality education
Educational resources	
Access to quality water	6 Clean water and sanitation
Water resource management and treatment	
Access to reliable and available electricity	7 Affordable and clean energy
Clean energy technologies	
Energy efficiency	
Sustainable transport	
Infrastructure	9 Industry, innovation and infrastructure
Access to information and communication technologies	
Smart and efficient industry technologies	
Residential housing	11 Sustainable cities
Sustainable and resilient cities	
Safety and security	12 Responsible consumption and production
Green consumption alternatives	
Circular economy products and services	
Waste management and recycling

Exclusions Across All Funds

Exclusions

Our exclusions policy

Our exclusion list contains companies and sectors that are excluded due to their **activities** or their **business norms**

This policy applies to **all funds** where Carmignac acts as an investment manager

Firm-wide hard restrictions

(transactions are prohibited and blocked on trading tools)

- ✘ **Controversial weapon manufacturers** that produce products that do not comply with treaties or legal bans¹
- ✘ **Tobacco producers, wholesale distributors and suppliers** with revenues over 5% from such products
- ✘ **Thermal coal miners** with over 10% revenues from extraction or 20 million tonnes from extraction
- ✘ **Power generators** that produce more CO₂/kWh than the defined threshold²
- ✘ **Adult entertainment and pornography** producers and distributors with over 2% revenues from such product
- ✘ **International Global Norms violations** including OECD Business Principle, ILO Principles and UNGC Principles.

¹ Companies that do not comply with: 1) The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines; 2) The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions; 3) The Belgian Loi Mahoux, the ban on uranium weapons; 4) The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons; 5) The Treaty on the Non-Proliferation of Nuclear Weapons (1968), which limits the spread of nuclear weapons to the group of so-called nuclear weapons states (USA, Russia, UK, France and China); 6) Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons

² In line with the 2 ° C scenario suggested by the IEA or new coal/nuclear build or Gas>30%, Coal >10%, Nuclear >30% revenues if CO₂ data not available

Please refer to Carmignac's exclusion policy for further detail
https://www.carmignac.lu/en_GB/responsible-investment/policy
Exclusion lists are updated on a quarterly basis

Our Exclusion Policies*

ENERGY EXCLUSION POLICY

- ✘ **Thermal coal** extraction companies and their related supply chain are excluded
- ✘ **Conventional and unconventional oil and gas** production and exploration companies and their related supply chain ⁽¹⁾ are excluded
- ✘ **Power generation** companies must not exceed 374 gCO₂/kWh carbon intensity and cannot structurally increase nuclear- or coal-based power generation ⁽²⁾

ETHICAL EXCLUSION POLICY

- ✘ **All Controversial weapons** companies³
- ✘ **Conventional Weapons including components** companies (5% revenue hurdle)
- ✘ **All Tobacco** producers. Wholesale distributors and suppliers (5% revenue hurdle)
- ✘ **Adult Entertainment** companies (2% revenue hurdle)
- ✘ **Gambling** companies (2% revenue hurdle)
- ✘ **Norms based** exclusion including UN Global Compact violations human rights, labour rights, environment and corruption
- ✘ **Alcohol** producers (10% revenue hurdle)

* Our Energy and Ethical policies are aligned with the Quality Standards of the Belgian SRI label (1) Conventional energy extraction sources: oil and gas. Unconventional energy extraction sources: Tar/oil sands, shale oil, shale gas and Arctic drilling. Conventional energy extraction sources: oil and gas (2) Power generation companies may be deemed investable if they i) have a SBTi target set at well below 2° or 1.5° C, or ii) generate >50% of revenues from renewable energy power source, or iii) dedicate > 50% capex to renewable energy power source. (3) Companies that do not comply with: The Ottawa Treaty (1997) which prohibits the use, stockpiling, production and transfer of anti-personnel mines; The Convention on Cluster Munitions (2008) which prohibits the use, stockpiling, production and transfer of cluster munitions; The Belgian Loi Mahoux, the ban on uranium weapons; The Chemical Weapons Convention (1997) which prohibits the use, stockpiling, production and transfer of chemical weapons; The Treaty on the Non-Proliferation of Nuclear Weapons (1968), which limits the spread of nuclear weapons to the group of so-called nuclear weapons states (USA, Russia, UK, France and China); Biological Weapons Convention (1975) which prohibits the use, stockpiling, production and transfer of biological weapons. 1980 Convention on certain conventional weapons concerning non detectable fragments, mines , incendiary weapons, blinding laser weapons. Exclusion lists are updated on a quarterly basis

A measurable sustainable objective

SFDR Fund
Classification**

Article **9**

Objective: to invest mainly (> 50%) in shares of companies that derive more than 50% of their revenue from goods and services related to business activities which align positively with one of the nine SDGs that we deem as investible.

Carmignac Grande Europe UN SDG¹ alignment as of 31/12/2021

Examples of alignment as of 31/12/2021²

SDG 3

SDG 7

SDG 11

¹ The UN's Sustainable Development Goals (SDGs) are a collection of 17 interlinked global goals designed to be a "blueprint to achieve a better and more sustainable future for all". For more details: <https://sdgs.un.org/goals>

² Names can change over time depending on portfolio holdings

To find out more about our outcomes calculation methodology, please refer to page 10 of this presentation

Outcomes calculation methodology

- ▶ Our proprietary Outcomes Framework maps business activities to nine of the 17 Sustainable Development Goals (SDGs). We deem these nine SDGs as ‘investable’, which means that companies our funds can invest in are able to support progress towards these goals, through their products and services. The investable SDGs identified by Carmignac are: SDG 1: No Poverty.; SDG 2: Zero Hunger; SDG 3: Good Health and Well-being; SDG 4: Quality Education; SDG 6: Clean Water and Sanitation; SDG 7: Affordable and Clean Energy; SDG 9: Industry, Innovation and Infrastructure; SDG 11: Sustainable Cities and Communities; SDG 12: Responsible Consumption and Production.
- ▶ Aligned companies are identified through company revenue data. To do this, we have created a proprietary business activity classification system that we have mapped to the SDGs. This system uses raw company revenue data from FactSet to identify which companies operate in these business activities and are therefore aligned with the SDGs.
- ▶ In order to be considered SDG-aligned according to our Framework, a company must derive at least 50% of its revenues from business activities that have a positive contribution to at least one of the nine SDGs listed above. Once a company exceeds this 50% threshold, we consider the company to be ‘aligned’ and consider a fund’s entire economic exposure to that company as such when calculating fund-level alignment. Companies owned by a fund may not have a sufficient proportion of revenues coming from business activities that are positively ‘aligned’ to the SDGs, so a fund’s aggregate alignment across the investable SDGs may not total 100%.

A Low Carbon Strategy

Carmignac Portfolio Grande Europe Footprint as of 31/12/2021

■ Carmignac Portfolio Grande Europe

■ STOXX Europe 600

■ Low Carbon Target (Emissions 30% lower vs the index)

Carbon emission investment strategy

Dual environmental goals

- ▶ Alignment to environmental SDGs 7, 9 and 11¹
- ▶ Carbon emissions target (<30% of reference indicator CO2)

Energy related exclusions also add to the Fund's low carbon footprint

Full EU Taxonomy alignment** calculation will be performed and disclosed in periodic reports***

¹ To find out more about our outcomes calculation methodology, please refer to page 10 of this presentation

* To calculate the portfolio carbon emissions, the companies' carbon intensities (tonnes of CO2e /USD mn revenues converted to Euros, (Scope 1 and 2 GHG Protocol), S&P Trucost) are weighted according to their portfolio weightings (adjusted for holdings for which carbon emissions are not available), and then summed. To know more about S&P Trucost methodology, see following page.

** EU Taxonomy: https://ec.europa.eu/info/business-economy-euro/banking-and-finance/sustainable-finance/eu-taxonomy-sustainable-activities_en *** please refer to the fund prospectus 1 January 2022 for further explanation

Source: S&P Trucost, Carmignac, 31/12/2021.

Carbon calculations methodology

- ▶ Carbon emission figures are based on S&P Trucost data. The analysis is conducted using estimated or declared data measuring Scope 1 and Scope 2 carbon emissions, excluding cash and holdings for which carbon emissions are not available
- ▶ To determine carbon intensity, the amount of carbon emissions in tonnes of CO₂ is calculated and expressed per million dollar of revenues (converted to Euro). This is a normalized measure of a portfolio's contribution to climate change that enables comparisons with a reference indicator, between multiple portfolios and over time, regardless of portfolio size
- ▶ Fossil fuel % revenue is derived weighted average of % revenues excluding cash of each holding within the portfolio
- ▶ S&P Trucost methodology: Trucost uses company disclosed emissions where available. In the instance it is not available, they use their proprietary EEIO model. The model uses the revenue breakdown of the company by industry sector to estimate the carbon emissions¹. Although S&P Trucost does report Scope 3 emissions where available, such emissions are commonly considered to be poorly defined and inconsistently calculated by companies. As a result, we have chosen not to include them in our portfolio emission calculations

Definitions:

- ▶ Scope 1: Greenhouse gas emissions generated from burning fossil fuels and production processes which are owned or controlled by the company
- ▶ Scope 2: Greenhouse gas emissions from consumption of purchased electricity, heat or steam by the company
- ▶ Scope 3: Other indirect Greenhouse gas emissions, such as from the extraction and production of purchased materials and fuels, transport-related activities in vehicles not owned or controlled by the reporting entity, electricity-related activities (e.g. T&D losses) not covered in Scope 2, outsourced activities, waste disposal, etc
